DETAILED ACTION

The indicated allowability of claims 17 and 18 is withdrawn in view of the newly discovered reference(s) to Lofgren (US patent no. 2,292,140). Rejections based on the newly cited reference(s) follow. Consequently, the finality of the previous action is withdrawn.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claim Rejections - 35 USC § 102

Claims 17 and 18 are rejected under 35 U.S.C. 102(b) as being anticipated by Lofgren (US patent no. 2,292,140). Lofgren discloses a clamp comprising a substantially constant cross-sectional shape between a longitudinal end and a second longitudinal end distal to the first longitudinal end when cut transverse to a longitudinal axis (figure 6), an inner surface (19a) operative to apply compressive force; an exterior surface (figure 5); a means for compressing the inner surface (27) and a core retention clip (21) formed unitarily with the clamp adjacent the exterior surface, operatively extending between the first longitudinal end and the second longitudinal end and adapted to elastically retain an electrical cord therein. Regarding claim 18, wherein the compressing means comprises an over-center mechanism (27) for compressing the inner surface.

In response to applicant's recitation that the boom stand clamp or equivalently clamp intended for use with a boom stand for clamping first tube and second tube , a recitation of the intended use of the claimed invention must result in a structural difference between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art. If the prior art structure is capable of performing the intended use, then it meets the claim. Lofgren's clamp is capable of performing the intended use of being clamped on boom stand for clamping the first and second tube to form a generally fixed mechanical relationship therebetween.

Response to Arguments

Applicant's arguments with respect to claims 17 and 18 have been considered but are moot in view of the new ground(s) of rejection.

Claims 1 and 6-8 are allowed.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The prior art of record further demonstrate clamp with clip adjacent its exterior.
